TELEGO

PHP Developer

Belgrade

Tele Go is a Belgrade based IT company dedicated to developing tailor-made software solutions. Our approach is designed to support projects of various size and scope and help businesses define product functionality with greater flexibility and control. Company's current key focus areas include Web Development, Mobile App Development, Billing and Payment Solutions, Streaming and OTT Solutions, Smart Vending Machines.

We are expanding our team and are looking for a devoted and proactive PHP Developer to participate in creating great products with us!

Job Summary

As a PHP Developer you will be working alongside a great team of professionals, diving into different disciplines to broaden your knowledge in other fields of expertise as well as share your own. You will contribute to great architecture and build the base of an easily extendable and well-maintainable application.

Responsibilities

- Ensure that project success criteria are met;
- Perform day-to-day maintenance of production software systems;
- Stay current with emerging technology and its impact to the organization;
- Participate in performing application design and review.

Match your profile

- 4+ years of experience in backend development;
- Strong PHP object oriented programming skills;
- Experience with one of modern PHP frameworks (Laravel/Symfony/ZF);
- Advanced experience with SQL is required;
- Experience in building and using RESTful APIs;
- Experience with Docker, Kubernetes;
- Experience with modern JS framework is big plus;
- Experience with HTML and CSS is a plus;
- Comfortable with Unix operating systems.

TELEGO

We offer

- Full-time employment;
- Career opportunities;
- Challenging tasks in a highly professional environment;
- Working in small and excellent skilled teams;
- Competitive salary and conditions corresponding to high demands of the position.
